Aquatic Plantings Viability Test

Native Landscaping

Anticipated Timeline

- Winter 2023: Mow undesirable woody species
- Spring 2023 – Install aquatic plugs to test viability
- Summer 2023 – Contractor treatment of re-sprouts
- Fall 2023 – Supplement seeding in mowed areas
- Spring 2024 – Expand aquatic planting if previous year’s effort proved viable. Plant oak trees.

Oak Trees

Project Explanation

An increase in biodiversity, more habitat for a wide range of wildlife, and an ability to adapt to local conditions that has been in development for thousands of years are just a few reasons to promote native flora in our landscape. For more information about vegetation native to Illinois, please visit the [Illinois Native Plant Society](#)’s webpage.

For more information, please call the Natural Resources Supervisor at 630-554-4439.
